Project Plan: Incredible India – Tourist Guide Web App

📅 Duration: 4th August 2025 to 22nd November 2025

💻 Technologies: HTML, CSS, JavaScript, Bootstrap

🎯 Goal: To build a responsive and interactive tourism guide website focused on major Indian destinations.

🗓️ Weekly Schedule

Week 1 (4–10 August)

- Project introduction and expected outcomes.
- Create project folder and initial file structure.
- Create index.html with basic <html>, <head>, <body> tags.
- Add project title and welcome message.

Week 2 (11–17 August)

- Create about.html, destinations.html, and contact.html pages.
- Add introductory content about India and tourism.
- Use semantic HTML tags like <section>, <article>, <nav>.

Week 3 (18–24 August)

- Design layout for key destinations (Rajasthan, Goa, etc.).
- Add placeholders for images, descriptions, and links.
- Organize content using lists or basic tables.

Week 4 (25–31 August)

- Create a JavaScript-based quiz: 'Which Indian destination suits your personality?'.
- Use radio buttons and forms.
- Display quiz result using JavaScript DOM methods.

Week 5 (1–7 September)

- Develop a contact form with name, email, and message fields.
- Add JavaScript validation for form inputs.
- Display error messages if fields are empty or invalid.

Week 6 (8–14 September)

- Implement dark/light mode toggle using JavaScript.
- Toggle CSS classes to switch themes.
- Optional: store mode in localStorage.

Week 7 (15–21 September)

- Create an interactive gallery of tourist images.
- Use JavaScript to open full-size previews or modals.
- Add hover captions for each image.

Week 8 (22–28 September)

- Add search box to filter destinations.
- Implement JavaScript to dynamically show/hide matching cards.
- Show a message if no results found.

Week 9 (29 Sep–5 Oct)

- Link Bootstrap via CDN.
- Use Bootstrap grid for layout.
- Convert destination sections to responsive cards.

Week 10 (6–12 October)

- Add Bootstrap navbar with logo and links.
- Create a sticky footer.
- Use Bootstrap buttons for interactions.

Week 11 (13–19 October)

- Add image slider using Bootstrap Carousel.
- Include captions and autoplay settings.

Week 12 (20–26 October)

- Use Bootstrap accordion to show local tips.
- Alternatively, use tabs for culture, food, festivals, etc.

Week 13 (27 Oct–2 Nov)

- Check website on various devices.
- Use Bootstrap responsive classes for layout adjustments.
- Fix overflow or alignment issues.

Week 14 (3–9 November)

- Test all JavaScript functionality.
- Fix console errors and ensure smooth navigation.
- Review all page links and features.
